

March 13, 2020

As the impact of the Novel Coronavirus (COVID-19) continues to expand in the US, Carlisle HVAC Brands (Hardcast, DynAir and Gripnail) has received several inquiries about its ability to supply the various HVAC, general construction and industrial products. This update is being provided to address those concerns.

Products sold by Carlisle HVAC are manufactured in the United States and Canada. The vast majority of Carlisle HVAC's raw materials are sourced domestically, through multiple suppliers. The few raw materials sourced internationally have backup domestic sources that can be used in the event of a shortage or shipping delays. While the current situation is fluid, at this time we do not anticipate any significant delays or interruptions to our supply of raw materials or finished goods

Carlisle HVAC is ready for a busy year in HVAC and the other industries we support. We are in a strong inventory position with all factories operating on their regular production schedules. Carlisle HVAC's Manufacturing, Sales, Procurement, Logistics, and Service teams are working proactively to ensure the demand can be met. As a company, Carlisle HVAC is committed to providing its customers with the same high levels of service and support they've come to expect, regardless of what external challenges may arise.

Carlisle HVAC will continue to provide updates on this evolving situation as they become available. For the latest news about COVID-19 and more information about preventing the spread of illness in your community, visit www.cdc.gov.
